HOW TO PREPARE YOUR HORSE HAIR

- To make one piece of jewellery we need **270** strands of hair of the same length, this is approximately the width of a thick pencil. You can do this over time, or take hairs from two or more horses. **Every hair MUST BE 18 inches long**. There should not be any short hairs. Be careful so hair does not tangle. **NO SHORT HAIRS PLEASE. Turn bundle upside down and pull out all short hairs to guarantee you have enough long!**
- Keep different hair colours in separate bundles.
- Tie the end of each bundle with a horse-plaiting/elastic band.
- With the band holding the hair tightly together at one end, wash the hair with shampoo and ensure it's clean. **Please do not use conditioners or other products** (as it may damage the hair)
- Leave the hair to dry and then brush it through so there are no tangles.
- You may have to repeat washing!
- **The hair SHOULD NOT have a strong horse smell.**
- Loosely coil the bundle of hair into a plastic zip lock bag with your order form.
- Please post everything in a padded envelope to protect your hair. We recommend using *registered post*.

Please note the following: We will not be able to use any hair received that is unwashed, has tangles, knotted, or has a strong smell. It will be returned to you.
